

Project Executable Files

Date	06 July 2026
Team ID	XXXXXX
Project Name	Voice-Based Concept Understanding Analyser (VBCUA)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Voice-Based-Concept-Understanding-Analyser

- app.py
- requirements.txt
- README.md
- .gitignore
- assets/
 - └─ Images and UI resources
- components/
 - └─ Reusable Streamlit components
- pages/
 - └─ Home, Analysis, Dashboard pages
- utils/
 - └─ Helper functions
- services/
 - └─ AI processing modules
- models/
 - └─ AI model related files
- data/
 - └─ Audio and concept data
- reports/
 - └─ Generated PDF reports
- tests/
 - └─ Testing files
- Project Documentation/
 - └─ Project documents

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://voice-based-concept-understanding-analyser-wjtn7veyb47gmatdi5g.streamlit.app/
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Streamlit Cloud
Repository Link	https://github.com/divyakundakarla/Voice-Based-Concept-Understanding-Analyser.git
Demo Video Link	Video Project.mp4

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone the GitHub repository.
2. Open the project folder in Visual Studio Code.
3. Create and activate Python virtual environment.
4. Install required dependencies using:
`pip install -r requirements.txt`
5. Run the Streamlit application using:
`streamlit run app.py`
6. Open the local URL displayed in the browser.
7. Upload voice input and start AI analysis.

Step 5: Known Issues / Limitations

S. No	Known Issue / Limitation	Workaround / Status
1	Large audio files may take more processing time	Optimize audio size before upload
2	Accuracy depends on audio clarity	Use clear voice recordings
3	Limited language support currently	Future update can add multilingual support
